

**Presentazione del dott. Maximiliano Puccio**  
**Dottorato di Ricerca in Fisica - XXIX Ciclo**  
**Università degli Studi di Torino**

Dottorando: Maximiliano Puccio

Relatore: Massimo Masera

Titolo della tesi:

*Study of the production of nuclei and anti-nuclei at the LHC with the ALICE experiment*

Durante il triennio di dottorato il dott. Maximiliano Puccio ha seguito e sostenuto l'esame relativo ai seguenti corsi della Scuola:

- Parallel and distributed computing, docente: Prof. Marco Aldinucci
- Hands-on Fitting and Statistical Tools for Data Analysis, docente: Dr. Mario Pelliccioni
- Data Analysis Techniques, docente: Prof. Luciano Ramello
- Calorimetry in particle physics experiments, docente: Dr. Roberta Arcidiacono

L'attività di ricerca del dott. Maximiliano Puccio ha riguardato l'analisi dei dati raccolti dall'esperimento ALICE e lo sviluppo di algoritmi di ricostruzione per la fase di Upgrade dell'esperimento.

Il dott. Maximiliano Puccio ha analizzato la produzione di deutone e anti-deutone in collisioni tra nuclei pesanti estendendo ad alto momento trasverso le misure attualmente disponibili. Questo tipo di studi sono interessanti per capire quali siano i meccanismi di produzione di nuclei leggeri in collisioni tra nuclei pesanti.

Il candidato è anche responsabile per lo sviluppo degli algoritmi di ricostruzione del vertice primario di interazione tra le particelle del fascio del Large Hadron Collider in ALICE e dell'algoritmo di tracciamento per l'upgrade del tracciatore interno di ALICE.

Infine, nello scorso anno il dott. Maximiliano Puccio ha lavorato presso il CERN dedicando parte del proprio tempo alla manutenzione e alla supervisione della presa dati del rivelatore Silicon Drift Detector (SDD) dell'esperimento ALICE.

Durante la sua attività di ricerca il dott. Maximiliano Puccio ha mostrato notevole spirito di iniziativa, senso critico, indipendenza nell'organizzare

il proprio lavoro e grande capacità di collaborare attivamente in un team internazionale. I risultati della sua analisi sono originali e sono attualmente in corso di pubblicazione

Pertanto si esprime grande apprezzamento per il lavoro svolto dal Dott. Maximiliano Puccio durante il triennio del Dottorato di Ricerca.

## Relazioni su invito

- *Tracking in high multiplicity events*; VERTEX 2016; Sep 25–30 2016, La Biodola
- *Overview of ALICE results on anti-nuclei and anti-hypernuclei*; EMMI Workshop: Anti-matter, hyper-matter and exotica production at the LHC; Jul 20–22 2015, CERN

## Relazioni a conferenze

- *Studio della produzione di materia (iper-)nucleare a LHC con l'esperimento ALICE*; Incontro Nazionale di Fisica Nucleare (INFN) 2016; Nov 14–16 2016, Frascati
- *Nuclei and anti-nuclei production in Heavy Ion collisions*; Large Hadron Collider Physics (LHCP) 2015; Aug 31–Sep 5 2015, St. Petersburg
- *Deuteron and anti-deuteron production at LHC with the ALICE experiment*; Incontri di Fisica delle Alte Energie (IFAE) 2015; Apr 8–10 2015, Roma

## Scuole

- **11<sup>th</sup>** Hadron Collider Physics Summer School; Aug 11–20 2016, Fermilab
- International School of Subnuclear Physics; Jun 24–Jul 3 2015, Erice
- Efficient Scientific Computing 2014; Oct 19–25 2014, Bertinoro

## Workshops e altre conferenze

- Quark Matter 2015; Sep 27–Oct 3 2015, Kobe
- International Workshop for Future Challenges in Tracking and Trigger Concepts; May 12–14 2014, Frankfurt

## Visite e stages

- Cooperation Associate presso CERN (01/01/16 - 31/12/16)

## Elenco delle pubblicazioni

- [1] The ALICE collaboration. Centrality dependence of high- $p_{\text{T}}$  D meson suppression in Pb–Pb collisions at  $\sqrt{s_{\text{NN}}}=2.76$  TeV, year = 2015, journal = JOURNAL OF HIGH ENERGY PHYSICS. 2015:1–24.
- [2] The ALICE collaboration. Event-by-event mean  $p_{\text{T}}$  fluctuations in pp and Pb–Pb collisions at the LHC. *THE EUROPEAN PHYSICAL JOURNAL C, PARTICLES AND FIELDS*, 74:3077–3077, 2014.
- [3] The ALICE collaboration. Freeze-out radii extracted from three-pion cumulants in pp, p–Pb and Pb–Pb collisions at the LHC. *PHYSICS LETTERS. SECTION B*, 739:139–151, 2014.
- [4] The ALICE collaboration. Performance of the ALICE experiment at the CERN LHC. *INTERNATIONAL JOURNAL OF MODERN PHYSICS A*, 29:1430044–1430044, 2014.
